The Building Information Modeling System Company

BIM SERVICES

01

3D MODELING

We deliver Architectural, Structural & MEPF models to various sectors such as Residential, Commercial, Industrial, Hospital and Multipurpose buildings.

02

4D BIM

We link every object in a Building Information Model (BIM) with its corresponding schedule activity to create an accurate animation of the construction process and estimate duration.

03

5D BIM

We use 3D Models from different building trade to produce cost data. A complete rate analysis is performed using 3D element data which ensures accurate results.

04

FACILITY MANAGEMENT

BIM FM eliminates dependency on As-Built Drawings and provides reliable information about the existing conditions which reduces renovation cost & enhance building life cycle maintenance.

05

VISUALIZATION & WALK THROUGH

BIM involves digital simulation of construction activity. All tasks that are involved in real life project are simulated digitally. BIM will deliver all real-life results before it actually happens.

06

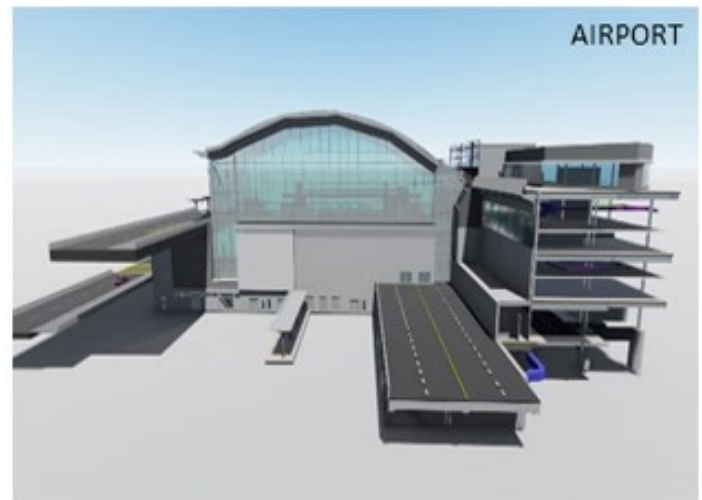

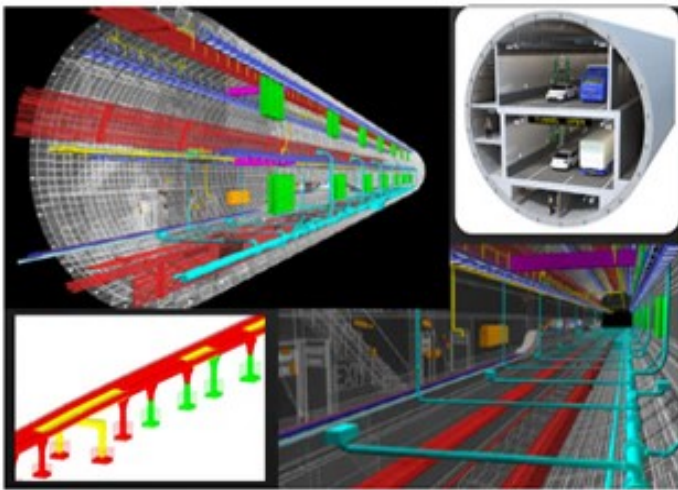

TRAINING

We offer unique, innovative yet practical BIM courses which help professionals to achieve their objectives with BIM and remain up to date with technical developments and engineering innovations.

OVERVIEW

3DPrime was founded in 2001 by Mr. S J Kadam. He has been in construction industry for more than 25 years. 3DPrime is a unique integrated BIM , Structural Analysis & Design, Project Management Consultancy company. The company has diversified its offering through unique BIM (Building Information Modeling) services & BIM based Asset & Facility Management Support services.

- ☞ Completed more than **6000 International & Domestic Projects**.
- ☞ We are **single window solution** for total requirements of a construction project.
- ☞ We have **capability of handling any scale project**, be it single bungalow, massive multi-use township complex, shopping malls, commercial complex etc.
- ☞ Our team of engineers is well-versed with USA, UK, European, Australian and Indian construction standards.
- ☞ Our aim is to deliver projects steadily within planned schedule and budget by using the experience of our **expert team** and **advanced technology**.
- ☞ Our services are provided right from concept development to overall completion & execution of the project in **timely fashion**.
- ☞ Our services assist our customers to **achieve increased project control, save cost & time, reduce risk**, build efficiently & effectively by utilizing latest techniques like BIM & updated international standards.

BENEFITS

Cost & Time Saving

BIM eliminates 5% - 20% unnecessary costs & reduces project duration.

Project Control & Management

Project Head, Management team and Client can control project effectively.

Improved Coordination & Collaboration

75% – 80% time saving in Design and Execution Coordination.

Better Accessibility

Total Project Data is available 24x7 with secure channels.

Improved Quality & Data Accuracy

BIM eliminates rework & facilitates material management, provides exact quantities.
